

Description

Professional development for all managers, trainers and supervisory staff of FORS accredited fleet operators.

FORS Practitioner ensures companies are equipped with the latest industry best practice in safe, green and efficient fleet operations.

Overview

FORS Practitioner is a series of ten workshops, open to all FORS accredited operators, which cover all aspects of fleet management including:

- ⌚ Developing fleet management policy
- ⌚ Managing work related road risk
- ⌚ Managing driver fitness and health
- ⌚ Managing driver training and development
- ⌚ Post-collision procedures and analysis
- ⌚ Safe and efficient fleet management
- ⌚ Reducing fuel use and minimising environmental impacts
- ⌚ Minimising transport fines and charges
- ⌚ Measuring and monitoring road fleet performance
- ⌚ Managing noise in logistics

Delegates can attend one or all of the workshops, in any order. Once an individual has completed all ten workshops, they will achieve FORS Practitioner status.

What will you learn from FORS Practitioner?

- ⑩ The regulatory and legal requirements governing fleet operations
- ⑩ How to develop and implement transport policies and procedures
- ⑩ How to manage work related road risk and improve road safety
- ⑩ How to investigate collisions and analyse data to reduce the risk of accidents
- ⑩ Industry best practice for increasing safety, efficiency and reducing environmental impact
- ⑩ Establish and understand the importance of noise on the environment and who is affected both inside and outside of the operation

Benefits of attending FORS Practitioner

- ⑩ Workshops will keep you up to date with industry developments and best practice in safe, green and efficient operations to help you to maintain and progress your FORS accreditation
- ⑩ Once you have completed the ten workshops you become a FORS Practitioner. The qualification is valid for five years

“The FORS Practitioner workshops have been invaluable in providing the knowledge and training to our management team to control and develop our existing logistical management system, in line with current and forthcoming legislation.”
