

# Summary of changes

This document combines the FORS Standard v4.1 and the separate Guidance on demonstrating the requirements of the FORS Standard v4.1.i into a single document. In this version 4.1.ii, there are no changes to the requirements of the FORS Standard. There have been minor clarifications to the demonstration of the FORS requirements and these are shown in the following table.

Item	Standard v4.1 and Guidance v4.1.i	Standard and Guidance v4.1.ii
Various	Policy or documented policy	Written policy  This is a clarification about the requirement to produce written policies. For small operators, please read Section 2.4.
Small operator	Small operator definition - terminology made consistent across all FORS documentation.	
Section 2.8 and resources for each requirement	Not applicable	General resources and specific resources have been added where applicable for each requirement.
V1	Specialist equipment includes speed limiters, tachographs, tanks and lifting equipment or any equipment related to the operation of the service or contract, which may include cranes, hoppers, fork-lifts, tail-lifts or any other equipment subject to the LOLER regulations.	Specialist equipment includes <del>speed limiters</del> , tachographs, tanks and lifting equipment or any equipment related to the operation of the service or contract, which may include cranes, hoppers, fork-lifts, tail-lifts or any other equipment subject to the LOLER regulations. <i>Also include in your evidence any statutory legal checks for example calibrated roller brake test.</i>
S1 - G1		Inclusion of FORS Rules and Procedures section 4 covering validity of existing Silver/Gold accreditation when applying for re-approval of Silver/Gold.
