

FORS Professional eLearning

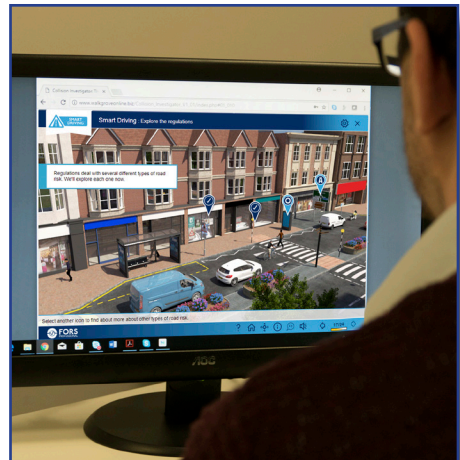

FORS Professional is a comprehensive package of essential training for managers and drivers, delivered with cutting edge content to help operators meet the FORS Standard.

FORS Professional is designed to improve knowledge and professional standards for any commercial vehicle operator, addressing in detail today's safety and efficiency challenges.

As part of the FORS Professional suite of training, there are a number of eLearning modules available for both managers and drivers.

The FORS eLearning modules are immersive, online experiences that provide challenging scenarios, in a controlled way.

FORS eLearning modules generally take 20-40 minutes to complete. Certificates are available to download on successful completion of the quiz and the participant's name will automatically be added to the FORS Professional training register.

 Fleet Operator Recognition Scheme

eLearning for drivers

 **Van Smart** – by simulating a typical driver's day, this module highlights good practice that all van drivers should be using.

 **Cycle Safety** – enables drivers to recognise the causes of collisions and how to minimise the risks to vulnerable road users.

 **Smart Driving** – focuses on the basics of road safety and explores some of the more advanced techniques of concentration, observation and anticipation.

 **Bridge Smart**– provides detailed, yet easy-to-digest, measures on reducing incidences of bridge strikes, while at the same time offering procedural advice.

 **Pedestrian Safe** – educates drivers on the specific dangers pedestrians face and what they can do to protect them.

 **LoCITY: Time to clean up** – course participants will learn fuel efficient driving techniques to save fuel and benefit the environment.

 **Security and Counter Terrorism** – raises driver awareness of potential security and terrorist threats.

 **TruckSmart** – focuses on the importance of driving roadworthy HGVs and the role of the driver in ensuring that vehicles and loads are safe and legal at all times.

 **Smart Deliveries** – aims to encourage drivers to comply more closely with the rules and regulations associated with parking and loading, thus avoiding fines and charges.

eLearning for managers

 **LoCITY Fleet Management: time to look ahead** – managers will benefit from a thorough grounding in alternatively fueled vehicles and their pros and cons against traditional diesel and petrol power.

 **Road Risk Champion** – for those who have attended the classroom learning.

 **Collision Investigator** – for those who will be investigating collisions and who have attended the classroom learning.

Limited online access? Download group eLearning training packs from your dashboard.

 Reminder – under requirement D4 Professional Development, drivers must undertake one safety related FORS eLearning module. Cycle Safety, Pedestrian Safe, Van Smart, Smart Driving and Bridge Smart are the current safety related FORS eLearning modules covering safe driving that satisfy the requirement.
